

*Bring your Exhibits Alive™
by transporting visitors into the past with
grainy films that recall people and things long gone...
or thrust them into present day reality
with videos as entertaining, instructive or
shocking as those on YouTube™.
Adept with remote controls and touchpads, today's visitors
are ready to take control over the videos they view....*

Signal-Innova's FlashVideo DV+, our most economical interactive video player, makes it easy to offer viewers many video choices. A looping video launching on startup attracts visitors, who can be offered up to 8 videos triggered by pushbuttons.

Using convenient CompactFlash™ (CF) memory cards for storing video segments, Signal-Innova's FlashVideo DV+ makes it easy to update and replace videos.

The Quagga stallion of Louis XVI at Versailles.
A relative of the zebra, it has been extinct for 125+ years.
A Quagga rebreeding project is underway in South Africa.

FEATURES

COMPACT SIZE - FITS IN SMALL SPACES

The small size (6.5" x 4.25" x 1.5") of FlashVideo DV+ enables installation in tight spaces such as kiosks or in small exhibit housings.

UNATTENDED LOOPING PLAYBACK

FlashVideo DV+ features auto start and looping playback of one or more videos and/or photos. Pushbutton interactivity is available as an option (see below).

NO MOVING PARTS = RELIABILITY

Use of Compact Flash™ cards for video storage eliminates mechanical problems associated with videotapes, laser disks and DVD players.

EASE OF UPDATING CONTENT

A CF card reader/writer and a PC are the only equipment needed to load new video files. A USB memory stick formatted for USB updating can also be used.

STANDARD FORMATS

FlashVideo DV+ accepts MPEG-2 (.mpg) and MPEG-4 (.avi) video file formats. JPEG photo files are also supported.

The unit plays standard definition video at 720x480 NTSC and 720x576 PAL. JPEG stills are supported at 1280x720. (Signal-Innova also offers HiDef video players.)

STANDARD OUTPUTS

Video output to TV or monitor is by Composite, S-Video, VGA and Component (YPbPr).

Audio output is through a speaker out jack at 1.5W @4ohm stereo.

READY-TO-GO PLAYBACK

Signal-Innova's FlashVideo DV+ basic package includes a 2GB CF card, AV cables and loading of your looping video file with playback testing before your order is shipped. If you prefer to load your own files, the CF card will be loaded with demo files.

PUSHBUTTON INTERACTIVITY (OPTIONAL)

If configured for pushbutton interactivity, FlashVideo DV+ invites visitors to select which video to watch. The looping attract video can be interrupted when any of up to 8 pushbuttons is pressed.

When ordered with the Pushbutton Interactivity option, FlashVideo DV+ is shipped with Signal-Innova's custom button connectors, pushbuttons and a CF card with the pushbutton setup.

FLASHVIDEO DV+ BASE PACKAGE

ABOUT COMPACT FLASH™ CARDS:

FlashVideo DV+ functions better with some brands and speeds of CF cards than others. CF cards supplied by Signal-Innova have been tested for compatibility. If you use your own CF card and encounter problems, please use the card supplied with FlashVideo DV+ to test player functioning.

CompactFlash™ is a U.S. registered trademark of SanDisk Corporation.

SUGGESTED APPLICATIONS

- Interactive exhibits
- Museum, zoo & aquarium exhibits
- Dramatize historical displays
- Nature & animal videos to enliven, educate and entertain
- Trade show & convention sales exhibits
- Corporate lobby exhibits
- Fund-raising displays
- Your unique application
