

## PASSIVE INFRARED (PIR) MOTION DETECTORS

### Hands-off triggering devices “magically” start your audio or video!

Let your visitors' body heat signal the audio repeater, video player or other interactive to start playing.

PIR Motion Detectors use InfraRed technology to sense a person's body heat energy in the form of radiation. When a human passes in front of the sensor's field of view, the temperature rises from room temperature to body temperature.

The sensors recognize the change and send out a triggering signal.

Compatible with Signal-Innova's FlashAudio and FlashVideo products.

#### Motion Detector (top left)

Range: 20-30 feet

Coverage Angle: 85 degrees from detector

Dimensions: 2.5" wide x 3.5" tall x 1.75" thick

#### Mini Motion Detector

Range: 10-15 feet

Black or white

Dimensions:

2.625" wide x 1.375" tall x 1.25" thick

Mounting holes are 2.25" apart on center

Quarter for scale only
