

MINI SOUND TRANSDUCER

Turn a graphic panel into a speaker with a Mini Sound Transducer!

Add sound to small exhibit areas with our economical Mini Sound Transducer mounted behind the panel and hidden from view.

Transducers are basically a speaker coil attached to a pad that conducts vibration into whatever surface it is mounted on.

Compatible with Signal-Innova's FlashAudio digital repeaters.

Normal Input:

1 Watt continuous; 3 - 6 Watts maximum
4 Ohms

Dimensions:

2" Diameter x 1.4" high
Weight: 8.6 oz

Mounting: Adhesive pad included, or mount with screws around periphery of removable top disc.
